30" Built-In Custom Panel Single Door Refrigerator

BOSCH
Invented for life

Benchmark® Series – Custom Panel B30IR905SP

Installation Details

HEATKITB80 Heater Kit

When two appliances are installed side-by-side a sealing kit must be used. For combinations that involve a freezer column, this kit is included. For all other (non-traditional, i.e. two bottom freezers) side-by-side combinations or instances where any appliances are installed less than 6" (152 mm) apart from one another but not connected side-by-side, purchase this kit. This kit is also recommended for use with any installation in areas that are subject to humidity, or located next to an outside wall.

IMPORTANT: Handleless Panels should not be installed on units without the soft close capability. If you are uncertain if you have a refrigeration unit with soft close capability please contact our customer team by calling 1-800-944-2904.

If your cavity height leaves a visible gap under your countertop when you open the drawer:
Fit the supplied cavity bracket (or a custom cavity filler panel) before installation in order to conceal any gap at the top of the cavity left after installation.

6 CUSTOM DRAWER PANEL SPECIFICATIONS

FRONT PANEL MATERIAL SPECIFICATIONS

- 5/8–13/16" (16–20mm) panel thickness
- Adequately sealed to withstand moisture (122°F/50°C @ 80% RH)
Because of it being a hot and wet environment generally, the back and sides of the panel should be completely sealed with a waterproof vapour barrier (ie polyurethane) to prevent damage to the panel.
- The back of the panel (including any integrated handle) should be completely flush so that the seal between the panel and the rubber trim is maintained.
- Installation outside these specs may result in condensation on cabinetry surfaces.
- Maximum weight of panel: 20lb (9kg)

The following calculations assume the top of the upper panel is aligned with the top of the adjacent cabinetry.

WIDTH OF THE PANEL

Measure **A** (the width between adjacent door/drawer fronts) and write it in the first box below, then complete the equation.

WIDTH OF PANEL

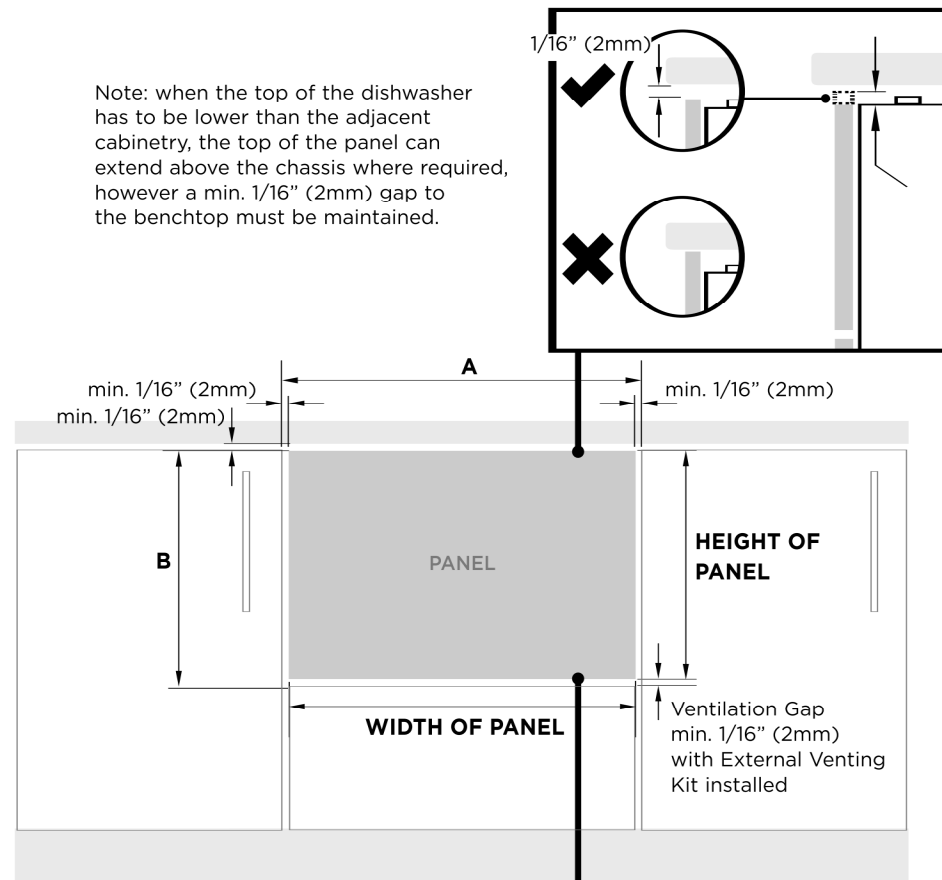

$$\boxed{A} - 2 \times \boxed{\text{Clearance to adjacent cabinet front (min. 1/16" (2mm))}} = \boxed{\text{WIDTH OF PANEL (23 7/16" - 24 3/16" (596-615mm))}}$$

HEIGHT OF THE PANEL

HEIGHT OF PANEL

$$\boxed{B} - \boxed{\text{Ventilation Gap (min. 1/16" (2mm))}} = \boxed{\text{HEIGHT OF PANEL}}$$

Note: when the top of the dishwasher has to be lower than the adjacent cabinetry, the top of the panel can extend above the chassis where required, however a min. 1/16" (2mm) gap to the benchtop must be maintained.
