FRAMEKIT10

Freedom® Frame Kit

For any custom column installation in 24-inch deep cutouts. With two metal side trims whose placement between the interior cutout wall and the appliance helps overcome the challenge of unfinished cabinet returns.

HANDLES

Choose between two options:

PR36HNDL20

36-Inch Professional Series Handle

or

MS36HNDL20

36-Inch Masterpiece® Series Handle

HEATRKIT20 – 13W @ 120V

Freedom® Heater Kit

When two appliances are installed side-by-side a sealing kit must be used. For combinations that involve a freezer column, this sealing kit is included. For all other (non-traditional, i.e. two wine columns, two bottom freezers, etc.) side-by-side combinations or instances where any appliances are installed less than 6-inches (152 mm) apart from one another but not connected side-by-side, purchase this kit. This kit is recommended for use with any installation in areas that are subject to humidity, or located next to an outside wall.

FILTERS

REPLFLTR55

Freedom® Water Filter
Replacement water filter for use in all freezer and bottom freezer models

Coffee System

DIMENSIONS

WIDTH

W

24" Model	$23\frac{1}{2}"$ (597)
30" Trim	$29\frac{7}{8}"$ (759)

Planning Information

The coffee system can be installed in a standard or flush inset application. Trim kits are available for vertical, single and horizontal configurations. All 30" trim options are based on model EC24/B. There are no trim options for model EC24/S.

The sides of the cabinetry opening must be adequate to support installation of the mounting slides. Refer to the illustration below.

Finish the edges of the opening. They may be visible when the unit is slid forward.

For standard installations, the face trim will overlap stiles and rails. Refer to the chart below.

For flush inset installations, a minimum 1/8" (3) reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

COMBINATION INSTALLATIONS

IMPORTANT NOTE: If a product is installed next to the coffee system, a horizontal kit must be specified. For all other configurations, a vertical kit must be specified.

To install a coffee system above a cup warming drawer, one opening for both units must be specified. To achieve the minimum reveal between the units, place the coffee system support rails on top of the cup warming drawer, then secure the rails to the sides of the cabinet. Any material between the units will increase the horizontal reveal between the two products.

INSTALLATION REQUIREMENTS

BASE SUPPORT		MIN
Coffee System		100 lb (45 kg)
TRIM OVERLAP	24" MODEL	30" TRIM

PLUMBING

COVE OPENING WIDTH Cove dishwashers accommodate varying opening widths. A 23 5/8" (60 cm) width provides minimum reveals and is ideal for new construction. A 24" width is also common; however, reveals for a 24" opening will be larger than the reveals for a 23 5/8" opening unless the panel width is adjusted accordingly. 24" and 60 cm stainless steel panels are available and must be specified accordingly.

PANEL SPECIFICATIONS For complete panels specifications including width/height, weight requirements and thickness requirements visit subzero-wolf.com/reveal.

DOOR CLEARANCE

Undercounter models can be installed flush with surrounding cabinetry. Depending on the thickness of the custom door panel, it may be necessary to install the unit 1/4" (6) beyond the front surface of adjacent cabinetry to prevent interference when the door is opened to 145°. Refer to the full-scale template on page 97.

Standard Handles

Optional stainless steel tubular and pro handles are available through an authorized Sub-Zero dealer. For local dealer information, visit the find a showroom section of our website, subzero.com.
